MOBILITY BP Pharmacie

During this experience in a foreign country, the apprentices will have to play a part in the following tasks (that are written in the exam regulations)

In the context of their experience abroad, the apprentices will have to work **on some tasks.**

As an example, these are the tasks referenced for the 2 year exam :

Stock management :

- Discover the organization of the dispensary (from the delivery to the dispensing to the customer)
- Manage an order (delivery of the goods, control, application of the multiplying coefficients…)
- Manage a direct operation (receiving goods, control of the goods…)
- Use of the computer (orders…)
- Identify the original and the generic drugs
- Preparation of the orders for wholesalers
- Shelving, enhancement of the products in the point of sale)
- Follow-up and stock management (out of date products, inventory, respect of the cold chain)

Analysis of the prescription :

- Master the complete reading of the prescription and the pricing
- Enforce the legislation (respect of the list of poisonous substances and of the pictograms of vigilance)
- Manage all the contents of the prescription and provide answers to anomalies
- Identify the usual dosage (therapeutic doses)
- Work out the quantities to issue on a prescription
- Provide advice to the patients

Good practices of preparations :

- Realization of magistral and medicinal preparations
- Respect of the protocol of traceability (manufacturing sheet, register of prescriptions, register of raw material)
- Labelling

Family medication :

- Take down the main medication of the pharmacy (seasonal products…)
- Identify the main pathologies (winter, seasonal) and the related drugs
- Give the appropriate advice (respect of the protocol of diagnosis)

Administrative follow-up of the computer pricing (direct payment by insurers) :

- Perform the remote transmission
- Follow-up of payment of the different cash desks
- Analyze the administrative anomalies (return, rejection…)
- Master the follow-up of files
